As such, the course will deal with operational, intelligence, legal, offensive and defensive dilemmas in counter-terrorism decision making.

The Legal Challenge and United States Homeland Security (Banks & Souther)
The course is composed of two modules. The first part of the course will explore the legal aspects of confronting terrorism and radicalization through case studies and the development of basic principles of international and domestic laws to examine problems of intelligence investigations and surveillance, interrogation and detention of terrorist suspects, criminal prosecution and its methods and military responses to terrorists.

The second part of the course will examine the increasing terrorist threat to the United States and outline the organizational and operational strategies designed to reduce America's vulnerability to terrorism and respond to an intelligent and adaptive adversary, which is becoming more successful in recruiting Americans.

Counter-Terrorism Issues and Challenges for Homeland Security (Hoffman)
The course will deal with current and future trends and patterns in terrorism, as well as levels of cooperation between police, military and civilian agencies, intelligence analysis and dissemination, preparing for CBRN terrorism and terrorist exploitation of the internet and other media.

The terrorism Threat-Where do we stand? What needs to be done? (Jenkins)
This course examines the nexus of terrorism, counterterrorism and homeland security. It is intended to acquaint students with the dynamics, policy options, and challenges involved in countering terrorism and defending the homeland and by doing so, to establish a solid foundation upon which further expertise can be built.

The course will include among others, the following issues: Where do we Stand against Al Qaeda; "Do-It-Yourself Terrorism: Countering Homegrown Terrorism in the United States and Europe", "Dilemmas in Homeland Security Policy: Transportation, Aviation and Maritime Terrorism" and "Post-Modern Terrorism: Assessing the Threat of Nuclear Terrorism".

“This course gives insights into fundamental issues fueling global terrorism and opens up new possibilities and models for countering the threat.”
